DATA WIZARDRY IN HOGWARTS

The premiere lands on the day the buying stops

$2.5m

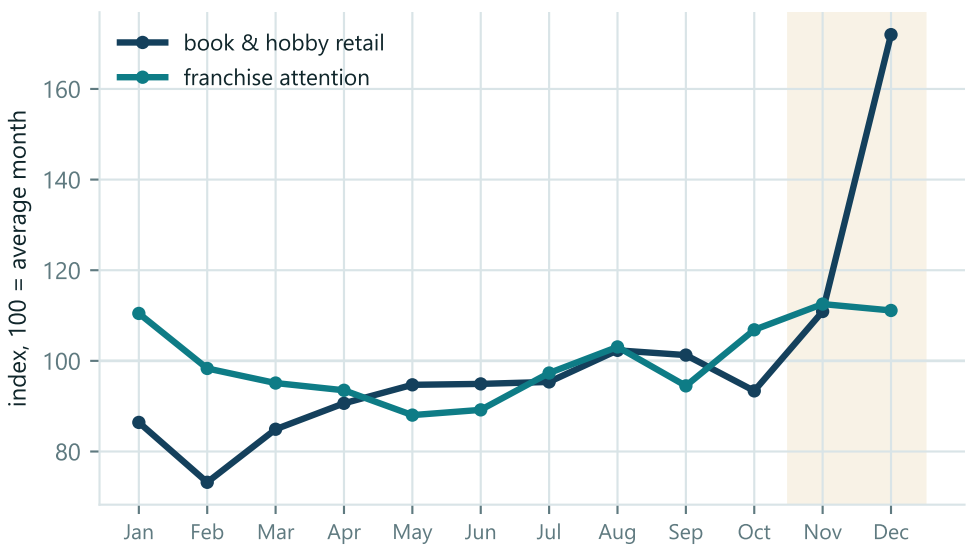

wizarding category buy for Nov 2026 – Mar 2027, about 73,119 units

Hold 50%–60% of it for January. Imported product was due on order by 2026-08-27.

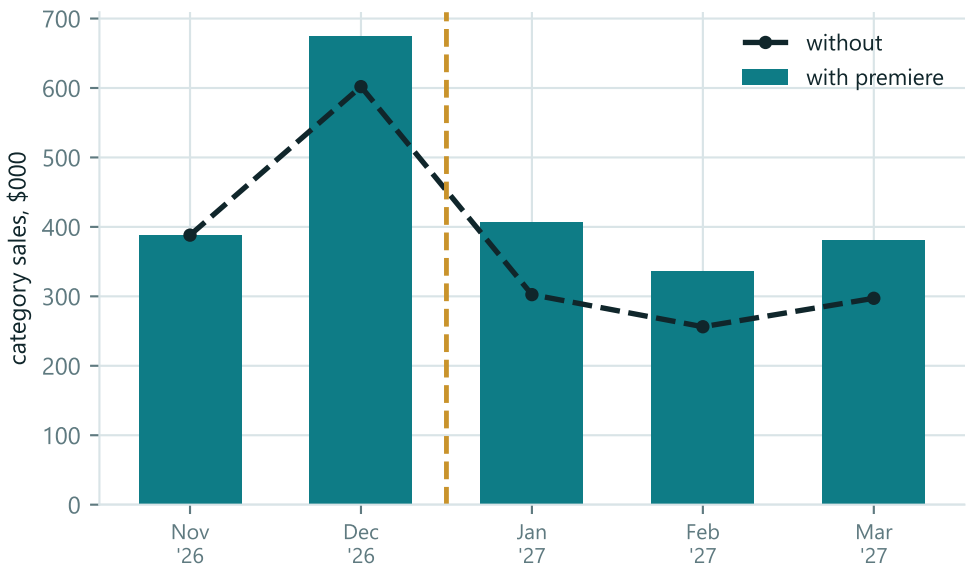

The category empties its shelves in the same weeks the show arrives.

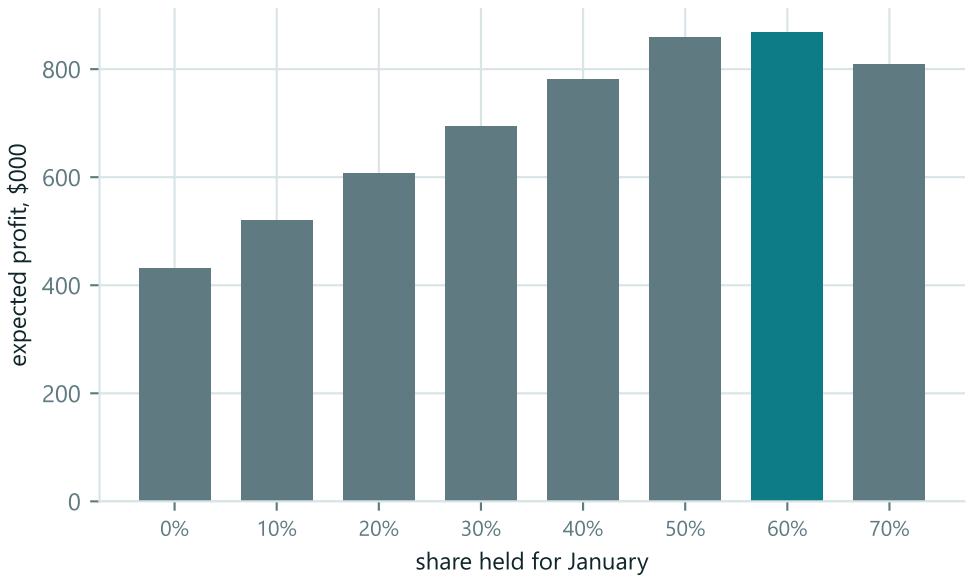

Retail swings 99 points a year. Attention swings 25.

January is where the premiere pays.

Hold back 50–60%. Expected profit peaks there.

The range, and why it is wide.

Low	$1.9m
Central	**$2.2m**
High	$2.6m

The premiere response is imposed from measured franchise events, not fitted. These are three readings of that evidence, not confidence intervals.

The conversion from attention to sales is an assumption (35%), not a measurement. Across its plausible range the buy runs $2.0m to $2.5m.
